PRESS RELEASE

AAT has delivered to HELOG Lufttransport KG two MEDEVAC Kits for the AS 330 Puma helicopters.

<http://www.helog.com/http/news/index.php>

The two helicopters are destined for the UN mission in Sudan and will fly MEDEVAC, reconnaissance and SAR Missions in Darfour, in Western Sudan.

The equipment has an EASA STC and consist of two quick change installed basic units each carrying three rescue stretchers and also an oxygen supply system.

The unit features easy patient loading and unloading with individual access to each patient (no need for sequential loading). Due to the modular system it is fully interchangeable and allows maximum mission flexibility with either installing one or two units in one helicopter.

Air Ambulance Technology GmbH is the one-stop-shop for tailor-made “quick conversion” air ambulance, corporate and mission interiors for helicopters and fixed wing aircraft. Our competencies cover design, engineering, production, testing and certification (EASA Part 21 DOA / POA Approval).

With more than 20 years experience and over 300 installations world wide we offer state-of-the-art products with highest quality and uncompromising handling features complying with all relevant airworthiness requirements. Each equipment is delivered with an STC from EASA.
